

High-speed 64-bit CineSat

2018-09-28

High-performance has always been an outstanding feature of CineSat. The new and optimized 64-bit version pushes CineSat's data processing to a new level.

- ✔ **Performance gain: 25%**
- ✔ Compatibility issues with 3rd party components resolved

The current development version V4.15 is about 20-30% faster than the CineSat 2018 spring release. This super-fast version will be available to end-users by end of 2018 as production release V4.16.
