

CineSat being ported to latest Ubuntu 22.04 LTS

2022-10-10

The CineSat spring release 2023 will run on all RedHat- and Debian-based systems.

After some irritation introduced by recent RedHat-based distributions, we are currently porting CineSat also to the Debian and Ubuntu Linux world.

We have selected the **Ubuntu 22.04 LTS** operating system as a very convenient development platform for Ubuntu software - and the Ubuntu based **Zorin OS 16 Pro** distribution as a perfect Linux replacement for Windows desktops.
